

Risk Management Primer Step 3 – Analyse the Risks

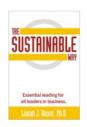

| | | Likelihood of Risk Occurring | | | Consequences | | | | | Level of Risk | | | | | |
|-----------------|--------------------------|---------------------------------|--------|----------|--------------|------|--------------|-------|----------|---------------|---------------|---------|------|----------|-----|
| Identified Risk | Existing Control Measure | Certain | Likely | Possible | Unlikely | Rare | Catastrophic | Major | Moderate | Minor | Insignificant | Extreme | High | Moderate | Low |
| | | | | | | | | | | | | | | | |
| | | | | | | | | | | | | | | | |
| | | | | | | | | | | | | | | | |
| | | | | | | | | | | | | | | | |
| | | | | | | | | | | | | | | | |
| | | | | | | | | | | | | | | | |
| | | | | | | | | | | | | | | | |
| | | | | | | | | | | | | | | | |
| | | | | | | | | | | | | | | | |
| | | | | | | | | | | | | | | | |
| | | | | | | | | | | | | | | | |
| | | | | | | | | | | | | | | | |
| | | | | | | | | | | | | | | | |

Risk Management Primer

Step 3 – Analyse the Risks Instructions to complete form

When conducting risk analysis deal with one risk at a time and follow through these steps:

1. Determine the likelihood of the risk occurring using a table such as this:

| Rat | ting | Interpretation | | | |
|-----|----------|---|--|--|--|
| Α | Certain | Very high probability (do we need %?) of occurrence; or | | | |
| | | Could occur several times (do we need number?) during a year. | | | |
| В | Likely | High probability (do we need %?); or | | | |
| | | May arise once in a one or two year period. | | | |
| С | Possible | Reasonable probability (do we need %?); or | | | |
| | | May arise during a five or ten year period. | | | |
| D | Unlikely | Plausible probability (do we need %?); or | | | |
| | | Could occur during next ten or twenty years. | | | |
| Ε | Rare | Very low probability (do we need %?); or | | | |
| | | Unlikely during next ten years. | | | |

2. Determine the consequences of the risk occuring using a table such as this:

| Rat | ting | Potential Impact on the Risk Category |
|-----|---------------|--|
| Α | Catastrophic | Multiple stakeholders will be severely impacted; or |
| | | Key business outcomes will not be achieved or result in disaster; or |
| | | Key business processes will be confounded; or |
| | | Customers will not be able to access services; or |
| | | Multiple fatalities will occur. |
| В | Major | Multiple stakeholders threatened; or |
| | | One stakeholder severely impacted; or |
| | | Key business outcomes threatened or may result in disaster; or |
| | | Key business processes threatened; or |
| | | Customers may not be able to access services; or |
| | | Single fatality. |
| С | Moderate | Some stakeholders, outcomes or processes affected; or |
| | | Considerable effort to rectify; or |
| | | Severe injury. |
| D | Minor | Some stakeholders required to enact remedy; or |
| | | With some effort outcomes achieved; or |
| | | With some effort processes function; or |
| | | Injuries requiring treatment. |
| Ε | Insignificant | Very small impact; or |
| | | Rectified by normal processes; or |
| | | Very minor injuries. |

3. Determine the level of risk of the risk occurring using a table such as this:

Consequences Minor Catastrophic Major Moderate Insignificant Likelihood В С Α D Ε Almost Certain Medium Medium Α Extreme High High В Medium Likely Medium Medium C Possible High High Medium Medium Low Unlikely Medium Low D High Medium Negligible Rare Medium Medium Medium Low Negligible
